## ABOUT THIS REPORT

The publication in 2013 of the first Key Data Report on Informatics Education in Europe, covering the 2008-2012 period, was a milestone event. For the first time, policy makers, education and research professionals and the general public could obtain precise information on the state of education in the area of highest importance for the future of Europe: Information Science and Technology. Instead of relying on rumours and guesses, discussions and decisions could now take advantage of verified data on the key parameters in various countries, beginning with the exhaustive list of institutions offering education in the field and continuing with a precise description of the degrees offered, the student and graduates numbers at every level, with distribution by gender, the maze of faculty and researcher positions and titles, and the most controversial topic of all: faculty and researcher salaries. Encouraged by the community's enthusiastic reception, we have continued, updated and improved the work, enlarging its scope and coverage, producing every year, since 2013, an annual edition of this report.

Like its predecessors, this report, the fifth edition of the series, emanates not from a government body or a group with a specific political agenda, but from academics in the field, represented by Informatics Europe (the association of academic and industrial research institutions in Informatics), with the sole purpose of furthering the understanding of the discipline's parameters through the provision of basic, factual data.

**Informatics Education in Europe: Institutions, Degrees, Students, Positions, Salaries. Key Data 2011-2016** provides an impressive picture of the state of Informatics education in Europe today. Based on an enormous amount of information from representative countries, it presents a wealth of fundamental data, starting from a list of institutions awarding degrees in the field and continuing with student enrolments, degrees awarded, gender information, academic titles, as well as precise and much-needed data about academic salaries across European countries.

This fifth edition has added a new country (Finland) to those already covered. Thanks to the active participation of many collaborators, acknowledged below, the report now covers Austria, Belgium, Denmark, Estonia, Finland, Germany, Greece, Ireland, Italy, Latvia, The Netherlands, Romania, Spain, Switzerland, UK, and France for salaries.

The Informatics Key Data report series will continue to provide the community with the precise and objective information that is indispensable for understanding the field and making informed, effective policy decisions.

***Disclaimer:** All facts and figures were obtained from publicly available sources. Although great care has been taken to ensure the data of interest was correctly extracted from these sources we give no warranty as to the accuracy or completeness of this information. The reader is solely responsible for any conclusions drawn from the information portrayed in this report as well as for the use of the data presented. Please report any incomplete or erroneous data to administration@informatics-europe.org.*

**Acknowledgements:** Clarissa Schmid, Gerald Steinhardt, Hannes Werthner (Austria); Kim Mens (Belgium, Wallonia and Flanders); Jens Christian Godskeisen (Denmark); Margit Grauen, Piret Orav (Estonia); Pekka Orponen (Finland); Antoine Petit (France); Hans-Ulrich Heiss (Germany); Panagiota Fatourou, Eleni Kanellou, Chrysti Symeonidou, Vasileios Theodosiadis (Greece); Stefan Decker, Alan Smeaton (Ireland); Enrico Nardelli, Carlo Ghezzi (Italy); Juris Borzovs (Latvia); Erik Barendsen, Jan van Leeuwen (The Netherlands); Simona Motogna (Romania); Josep Fernandez Ruzaña, Núria Castell Ariño (Spain); Jane Hillston, David Beamish, Neil McGillivray, Pim Totterdell, Paul Martin (UK): for invaluable help in obtaining and interpreting country-specific data. Bertrand Meyer, for invaluable contribution in the writing of the previous editions. Mehdi Jazayeri for proofreading and comments on this edition.

# Table of Contents

EXECUTIVE SUMMARY .....	3
1 INTRODUCTION .....	4
2 SOURCES OF DATA .....	5
2.1 METHODOLOGY .....	5
2.2 DATA SOURCES FOR SUBJECTS, STUDENT ENROLLMENTS, DEGREES AND INSTITUTIONS .....	5
2.3 DATA SOURCES FOR SALARIES .....	6
2.4 A GENERAL WARNING .....	6
3 NAMES OF SUBJECTS .....	8
4 SYSTEMS OF HIGHER EDUCATION .....	12
4.1 AUSTRIA .....	12
4.2 BELGIUM .....	13
4.3 DENMARK .....	15
4.4 ESTONIA .....	16
4.5 FINLAND .....	17
4.6 FRANCE .....	19
4.7 GERMANY .....	20
4.8 GREECE .....	21
4.9 IRELAND .....	22
4.10 ITALY .....	23
4.11 LATVIA .....	24
4.12 THE NETHERLANDS .....	26
4.13 ROMANIA .....	27
4.14 SPAIN .....	28
4.15 SWITZERLAND .....	29
4.16 UK .....	30
5 STUDENT ENROLLMENTS .....	33
5.1 FIRST YEAR STUDENTS .....	34
5.2 BACHELOR STUDENTS .....	39
5.3 MASTER STUDENTS .....	41
5.4 TENTATIVE EXTRAPOLATION TO THE WHOLE OF EUROPE .....	45
6 DEGREES .....	46
6.1 BACHELOR'S DEGREES .....	46
6.2 MASTER'S DEGREES .....	48
6.3 DOCTORAL DEGREES .....	52
6.4 RATIO BACHELOR GRADUATES/NEW STUDENTS .....	54
6.5 TENTATIVE EXTRAPOLATION TO THE WHOLE OF EUROPE .....	56
6.6 RELATIONSHIP BETWEEN SUPPLY AND DEMAND .....	56
7 POSITIONS AND TITLES .....	57
7.1 A BASIS FOR MULTINATIONAL COMPARISON OF ACADEMIC POSITIONS .....	57
7.2 AUSTRIA .....	59
7.3 BELGIUM .....	59
7.4 ESTONIA .....	60
7.5 FRANCE .....	60
7.6 GERMANY .....	61
7.7 GREECE .....	62
7.8 ITALY .....	63
7.9 LATVIA .....	63
7.10 THE NETHERLANDS .....	64
7.11 ROMANIA .....	64
7.12 SPAIN .....	65
7.13 SWITZERLAND .....	65
7.14 UK .....	66
8 SALARIES .....	67
8.1 SALARIES: OVERVIEW .....	67
8.2 SALARIES: PHD CANDIDATES AND POSTDOCTORAL RESEARCHERS .....	67
8.3 SALARIES: PROFESSORS .....	72
9 CONCLUSION AND OUTLOOK .....	80
APPENDIX A: INSTITUTIONS .....	81
APPENDIX B: SALARY TABLES .....	109
APPENDIX C: REFERENCES AND SOURCES CONSULTED .....	123

## Executive Summary

---

Informatics, the science behind Information Technology (IT), is a core enabler of Europe's future success. Crucial to that success is the availability of superb Informatics education throughout Europe.

In this report series, the first to attempt a general study of the state of the art in European Informatics higher education, the emphasis is on raw facts and figures rather than deep analysis; it provides the material for such analyses that others may wish to perform. Nevertheless, a number of salient points emerge:

- The field in Europe suffers from a **serious branding problem**. Even after an approximate translation to English, a good dozen terms are used to denote what is fundamentally the same discipline. In addition, there are numerous interdisciplinary study programs where Informatics is combined with **Business Administration** (e.g. Business Informatics, IT Management & Business, Business Information Systems), **Engineering** (Computer Science and Engineering, Electronics and Computer Engineering, Automation and Information Technology), **Mathematics** (e.g. Computing and Mathematics, Mathematical Informatics) or **Life Science disciplines** (e.g. Bioinformatics, Medical Informatics, E-health).
- The quantity and quality of available data varies considerably from country to country. In the interest of reliability, this report has mostly used data from countries where a solid and reasonably complete picture could be drawn from official sources. **Even when available, the data does not always allow direct comparisons, since definitions and methods of collection vary significantly from country to country.** It is very important for the field to ensure that **consistent, solid Informatics education data becomes available in all European countries.**
- Informatics is a well-developed academic field, with **hundreds of accredited institutions** training huge numbers of students for Bachelor, Master and PhD degrees.
- Extrapolating from more precise data in specific countries, we come to a rough estimate that:
  - around **three hundred thousand new students enrol each year in Informatics Bachelor programs in Europe.**
  - around **a million students are enrolled in Informatics Bachelor's programs across Europe;** the corresponding **estimated figure for Master students is close to two hundred thousand.**
  - around **hundred and forty thousand students graduate each year in Informatics Bachelor programs in Europe;** the corresponding **estimated figure for Master graduates is approximately fifty thousand.**
- **Female students are strongly underrepresented in Informatics studies in Europe. At the Bachelor level,** in all countries included in this report, excluding Romania, Greece and Estonia, **80% or more of the students enrolled or graduating in Informatics Bachelor programs are male.** At the Master level, female participation increases in some countries, but decreases in others; only in Romania, Greece, Estonia, Finland, Denmark, Ireland, Latvia and the UK female participation in Master studies exceeds 20%. **No significant progress in female participation has been observed over the past six years.**
- In the majority of the countries included in this report, excluding Denmark, Finland and the UK, **the number of students graduating every year is less than half the number of new enrolled students.** Students in Informatics are either taking an unusually long time to conclude their studies successfully or not concluding them at all. We don't know how completion rates compare with other disciplines.
- The **status of faculty** varies considerably across Europe. **The salaries vary even more.** Our detailed study of the salaries of faculty in twelve European countries **shows, for a similar faculty position, a difference in salaries that can reach a factor of ten or more.** For example, a full professor at the top level receives, in some countries, the salary of a high-level industry executive, whereas in others the compensation is more comparable to that of a junior engineer in the IT industry.
